UK BRANCH NETWORK

DECOMMISSION & RECOMMISSION

We use dedicated, trained and qualified IT engineers accredited to the highest levels in the delivery of our decommission/recommission services. Bishop's Move provides these services in support of standard desktop equipment through to full suites of server racks.

PROFESSIONAL PACKING

Our expert IT relocation teams are professionally trained to pack and wrap your equipment with environmentally friendly and re-usable packaging materials, including branded screen covers, individual computer crates and secure, seal-able cable assembly bags.

RELOCATION PLANNING

Bishop's Move can complete a pre-move audit of all equipment as necessary and include this as part your move matrix. We provide a detailed move programme to ensure all IT equipment is prioritized to ensure maximum time for recommissioning and testing.

TRACKED & AUDITED SERVICES

Auditing allows for a more informed relocation. All your IT assets can be audited and tracked. This catalogued data will help plan your relocation and also allow finance teams to plan depreciation and upgrade budgets.

CABLE MANAGEMENT

All IT cables on completion of recommissioning will be neatly placed into existing cable management services (trunking, trays etc). If appropriate we will also secure cables using Velcro strips to ensure cables remain secure and tidy.

IT CLEANING

As part of your relocation we can complete a full cleaning service of all your equipment including CPU's monitors, keyboards and phones. All the cleaning materials that we use are environmentally friendly.

IT RECYCLING & WEE WASTE

On completion of your relocation Bishop's Move can arrange for the fully audited and certified destruction of any unwanted equipment. This can include all screens and CPU's together with peripheral equipment such as catering equipment and fluorescent tubes.

UK BRANCH NETWORK

With specialist divisions and a UK network of branches, Bishop's Move can always offer you local contacts and a specialist team regardless of where you're based or where you're moving too.

POST MOVE MANAGEMENT

Bishop's Move is able to provide a full range of post move support services. These can include IT engineers as floor walkers on Day 1 to ensure any issues are dealt with promptly.
